

WAHYU WIDI WIDAYAT

IT Business Analyst | System Analyst | Digital Transformation & Process Improvement
Gresik, Indonesia | +62 812-4684-9929 | widayat1697@gmail.com | linkedin.com/in/widayatid

PROFESSIONAL SUMMARY

Results-driven IT Business Analyst with a proven track record in driving digital transformation and process improvement. Skilled in end-to-end requirement elicitation, business process mapping, and translating business needs into comprehensive technical documentation (BRD, FRD, User Story). Demonstrates strong stakeholder management, cross-functional collaboration, and SDLC support capabilities to deliver efficient, scalable technology solutions. Committed to enhancing operational efficiency and enabling data-driven decision-making.

WORK EXPERIENCE

IT Support & E-Commerce Coordinator

August 2025 – Present

UD. Dua Lebah Madu, Gresik, East Java

- Managed 6 active stores on Shopee and TikTok Shop end-to-end, including product management, inventory, order processing, and sales performance monitoring to ensure optimal operations.
- Designed and optimized data-driven digital advertising strategies, consistently achieving an ROAS of 18–20 and improving marketing budget efficiency.
- Drove 3–8% monthly sales growth through campaign optimization, product listing quality enhancement, and targeted promotional strategies.
- Collaborated with production and packaging teams to monitor stock availability, ensure accurate order fulfillment, and resolve customer order issues.
- Conducted market and competitor analysis; managed affiliate and partner marketing collaborations to expand market reach, increase brand visibility, and improve conversion rate and sales performance.

Assistant IT Business Analyst

September 2022 – July 2025

PT. Azlogistik Dot Com, Surabaya, East Java

- Performed end-to-end business requirements analysis and requirement elicitation via research and stakeholder interviews, supporting the development of approximately 60% of the logistics system (muatmuat) in a more structured and scalable manner.
- Collaborated with 4 Senior IT Business Analysts in preparing BRDs, FRDs, User Stories, and Functional Specifications to ensure clearly defined business requirements.
- Coordinated with stakeholders and 5 development team leads to align feature priorities, development timelines, and system implementation with the project roadmap.
- Developed flowcharts, process maps, and user flows to visualize business processes and improve cross-team understanding in system development.
- Supported SDLC-based system development through process evaluation, risk identification, and bottleneck analysis to enhance implementation effectiveness and technology solution quality.
-

Data Analyst Intern

February 2022 – August 2022

PT. Idexpress Logistik Indonesia, Surakarta, Central Java

- Compiled delivery performance analysis reports for 54 Transit Hubs and Franchise Branches in the Greater Solo and Yogyakarta regions using Microsoft Excel.
- Analyzed operational data to monitor new packages, delayed packages, and distribution issues to improve delivery process effectiveness.
- Collaborated with 10 supervisors and 3 regional managers on operational performance evaluation and delivery issue resolution.
- Generated daily, weekly, monthly, and annual operational reports as a basis for distribution performance evaluation.

INTERNSHIP EXPERIENCE

Systems Analyst Intern

September 2020 – October 2020

PT. Alfath Teknologi Kreatif, Malang, East Java

- Conducted requirement analysis and stakeholder elicitation for the development of a Camunda BPMN-based e-recruitment system for the outsourcing division of a state-owned bank.
- Translated business needs into business process flows, workflow diagrams, and system specifications as the foundation for application development.
- Collaborated with 5 stakeholders and the development team to ensure alignment between business requirements, system design, and technical implementation.

- Assisted 2 Senior System Analysts in preparing system documentation and data models to ensure structured system development.
- Delivered progress updates and development scope presentations to the project team to maintain transparency and milestone achievement.
